

Ramesh Rathod

Computer Engineering Undergraduate – Data Science – AI/ML Engineer

Maharashtra, India | +91 9325004315 | <mailto:iamrameshrathod01@gmail.com>

Professional Summary

Computer Engineering undergraduate with a strong interest in Artificial Intelligence, Machine Learning, Data Science, and Natural Language Processing. Experienced in building end-to-end machine learning applications, Android applications, and full-stack software solutions. Skilled in Python, Scikit-learn, Flask, Java, Firebase, SQL, and MongoDB. Passionate about solving real-world problems through intelligent systems and continuously learning modern AI technologies.

Education

Bachelor of Engineering (Computer Engineering)	2023-27
---	---------

Matoshri College of Engineering & Research Centre, Eklahara
Savitribai Phule Pune University
Current SGPA:6th Sem 8.33

Higher Secondary (Class XII)	2022
-------------------------------------	------

Maharashtra State Board
Percentage: 71.50%

Secondary School (Class X)	2020
-----------------------------------	------

Maharashtra State Board
Percentage: 85.00%

Technical Skills

Programming Languages

Python, SQL , HTML, CSS

Machine Learning

Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib

Artificial Intelligence

Machine Learning, Deep Learning, NLP, Large Language Models (LLMs), Prompt Engineering(ON GOING)

Databases

MySQL, MongoDB Atlas, Firebase Firestore

Frameworks

Flask

Tools

Git, GitHub, Android Studio, VS Code, Jupyter Notebook, Google Colab

Experience

Data Science Intern

NetLeap IT Training And Solutions

Duration: Dec 2025 – Feb 2026

- Developed machine learning models for predictive analytics.
- Performed data cleaning, preprocessing, and exploratory data analysis.
- Built Flask-based machine learning web applications.
- Worked on regression algorithms and model evaluation.
- Improved prediction accuracy through feature engineering.

Projects

MedicalScribe AI (on-going)

Python, FastAPI, Whisper, NLP, LLMs

- Developed an AI-powered medical transcription system to convert doctor-patient conversations into structured clinical notes.
- Integrated Speech-to-Text, Natural Language Processing, and Large Language Models for automated report generation.
- Designed scalable backend APIs and optimized the workflow for efficient documentation.
- Focused on improving transcription accuracy while reducing manual effort.

EduPulse – Student Performance Prediction

Python, Scikit-learn, Flask

- Built an end-to-end machine learning application to predict student academic performance.
- Performed data preprocessing, feature engineering, model training, and evaluation.
- Achieved approximately 78% R^2 score using Decision Tree Regression.
- Developed an interactive Flask web application for real-time predictions.

CineMatch AI Recommendation System

Python, Pandas, Scikit-learn

- Developed a Netflix-style movie recommendation system using machine learning techniques.
- Implemented content-based filtering using TF-IDF and cosine similarity.

- Explored recommendation evaluation metrics and hybrid recommendation strategies.

AI/ML Pipeline Builder(on-going)

Python, Machine Learning

- Designed an automated machine learning pipeline for preprocessing, feature engineering, model training, and evaluation.
- Reduced repetitive development tasks through reusable ML workflows.
- Included automated model comparison and hyperparameter tuning.

Library Equipment Management System

Java, Android Studio, Firebase Firestore

- Developed an Android application to manage laboratory and library equipment inventory.
- Implemented department-wise equipment management with cloud synchronization.
- Added equipment status tracking, remarks, and statistics dashboard.
- Awarded Runner-Up in the college Project-Based Learning (PBL) Competition.

Event Registration System

Node.js, Express.js, MongoDB

- Designed and developed a full-stack event registration platform.
- Implemented secure CRUD operations and participant management.
- Integrated MongoDB Atlas for cloud-based database storage.

Certifications

- Python Programming Certification
- Data Science and Machine Learning Internship Certificate – NetLeap IT Training And Solutions

Achievements

- Runner-Up – Project-Based Learning (PBL) Competition for the Library Equipment Management System.
- Successfully completed a Data Science Internship involving end-to-end machine learning development.
- Built multiple AI/ML applications focused on real-world problem solving.
- Active contributor to GitHub with projects in AI, Machine Learning, Android Development, and Web Development.

Leadership & Activities

- Volunteer, Entrepreneurship Cell (E-Cell), Matoshri College of Engineering & Research Centre.
- Participated in technical events, hackathons, project exhibitions, and innovation activities.
- Collaborated with multidisciplinary teams to develop software and AI-based solutions.

Research Interests

- Artificial Intelligence
- Machine Learning
- Deep Learning
- Natural Language Processing
- Large Language Models
- Retrieval-Augmented Generation (RAG)
- Computer Vision
- MLOps

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Operating Systems
- Computer Networks
- Object-Oriented Programming
- Software Engineering
- Artificial Intelligence
- Data Science

Languages

- English
- Hindi
- Marathi
